

This data sheet details Thrislington Gulf material specification, options and dimensions.

60mm specification falls into two sections:

Section One: Deals with the formalities of tendering, preliminaries, contractual, statutory and product performance considerations.

Section Two: Deals with the physical properties and performance fields of the product.

Standard Options

Composite Panel Code	Solid	Glaze	Base	Panel connection	Corner connection	Door	Door overpanel	RAL colour	Hardware	Complete from following Codes																																	
Solid panel	Code <input type="text"/> : (see below) Modular twin tray construction with welded assembly.																																										
Panel skin	1mm thick slip coated pre-galvanised steel to JIS G 3302 or equivalent																																										
Panel thickness	60mm.																																										
Panel core	Non Combustible mineral fibre infill or Honeycomb core.																																										
Glaze panel	Code <input type="text"/> : Full glaze			Code <input type="text"/> : Half glaze			Code <input type="text"/> : Top glaze																																				
Panel bases	Code <input type="text"/> : Aluminium			Code <input type="text"/> : Recessed																																							
Panel connection	Code <input type="text"/> : Pilaster																																										
Corner connection	Code <input type="text"/> : 90° corner panel																																										
Door overpanel	Code <input type="text"/> : Solid					Code <input type="text"/> : Glaze																																					
Solid Panel finish	Code <input type="text"/> PR : Polyester powder coating RAL																																										
Glaze Panel finish	Code <input type="text"/> PR : Polyester powder coating RAL																																										
Door Leaf	Code <input type="text"/> (see below) Modular twin tray construction with lock formed / seam welded assembly. double door with or without astragal.																																										
Door Skin	1mm thick slip coated pre-galvanised steel to JIS G 3302 or equivalent																																										
Door Leaf Thickness	44mm.																																										
Door Core	Non Combustible mineral fibre infill or Honeycomb core.																																										
Frame	Code <input type="text"/> (see below)																																										
Door frame	1.5mm thick slip coated pre-galvanised steel to JIS G 3302 or equivalent.																																										
Frame assembly	Welded.																																										
Door frame and door finish	Code <input type="text"/> PR : Polyester powder coating RAL																																										
Vision panel options	Code <input type="text"/> : (see below)					Size <input type="text"/> : (see below)																																					
Hardware options	Code <input type="text"/> : (see below)
